

EQUIP PROJECT: FIRST MILESTONE EXPECTED BY OCTOBER 2026

By October 2026, the EQUIP project will achieve its first major milestone with the development of a comprehensive framework designed to analyze coherent qualitative criteria in university partnerships.

To achieve this outcome, EQUIP will:

- » Analyze insights and lessons learned from the eQUATIC tool.
- » Explore emerging trends and advancements in partnerships, particularly within the context of the European Universities Initiative.
- » Develop an updated set of quality criteria tailored to modern international collaborations.

This milestone will be pivotal, as the EQUIP platform will build upon the in-depth analyses and reflections conducted during the initial phase of the project (Work Package: Development of Criteria for Quality Assurance in University Partnerships), which commenced in November 2025.
